

SECURE CONNECTED FINANCIAL INFRASTRUCTURE

“GSN Secured” solutions Isolating Critical Facilities and
Ensure Realtime monitoring

Challenge:

Financial infrastructure needs to maintain Complete isolation of BANKING operations while ensuring Safe Data Transfer and an Always ON Monitoring

Transaction Centers need complete isolation and restricted access from any external network in order to ensure high level of security.

Connecting multiple financial organizations and monitoring the operations constantly is essential for peak performance.

Solution:

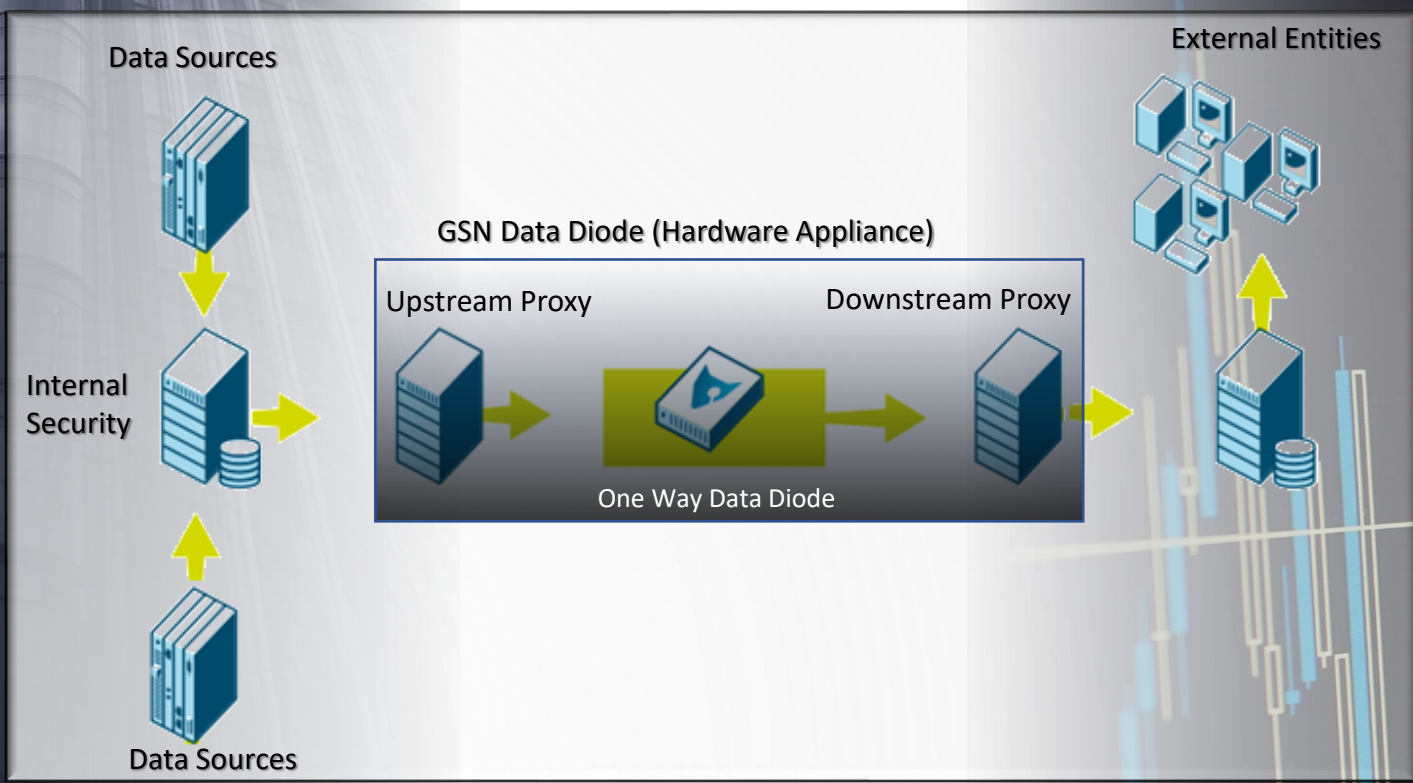

Connecting Financial Institutes with External Entities

Classified networks are connected one way to the External Entities, there is no inbound access.

Classified Banking Infrastructure

External Entities And Monitoring

Business Outcomes

Ensure visibility with a highest level of security at NO risk

Ultimate Security

Least Cost Maintenance
